Time	Narration
00:00	Welcome to the spoken tutorial on making a protective face cover at home.
00:06	In this tutorial we will learn about:
00:10	The need for us to wear a protective face cover.
00:14	Important warnings for health workers and COVID-19 patients.
00:20	Safety precautions regarding the protective face covers.
00:25	Procedure to make a protective face cover with and without a sewing machine.
00:32	Precautions before wearing and while removing the protective face cover.
00:38	Correct way to sanitize and store the protective face cover.
00:44	We must first understand the need to wear a protective face cover.
00:50	To protect ourselves from CoronaVirus, wearing a face cover is important.
00:56	India being densely populated, wearing a face cover is especially recommended.
01:03	To prevent and control Coronavirus many types of face covers are being used.
01:10	Among them homemade protective face cover is easy to make and can be reused too.
01:18	Before going ahead, please remember the important warnings.
01:23	Homemade face cover is not for health workers.
01:28	It is neither for people working with or in contact with COVID-19 patients.
01:37	COVID-19 patients should not use homemade face covers.
01:42	All such people must wear only the specified protective gear.
01:48	There are other safety precautions that you should always remember.
01:53	Homemade face covers do not give full protection.
01:58	They only reduce the chances of inhaling droplets in the air from an infected person.
02:06	Do not use the face cover without washing it.
02:10	Do not share your face cover with anyone.
02:14	Always maintain a minimum of 2 metres social distancing with everyone.
02:21	Frequently wash your hands with soap for 40 seconds.
02:26	We will now see a simple method to make a reusable face cover at home.
02:33	It can be made using a cotton cloth which is easily available at home.
02:38	While making it ensure that it covers the mouth and nose completely.
02:44	One should be able to tie it over the face easily.
02:49	Homemade face covers can be easily made with and without a sewing machine.
02:55	Let us first see how to make a protective face cover with a sewing machine.
03:02	You will need a 100% cotton cloth.
03:06	The colour of the cloth does not matter.
03:10	Before making, wash the fabric well
03:13	and boil it in salt water for 5 minutes.
03:17	Let the cloth dry properly and then use it.
03:21	Other items required are:
03:23	Four pieces of cloth strips
	Scissors
03:26	and A sewing Machine

03:29	I will explain the procedure to make a protective face cover.
03:34	Start with cutting the cloth for the face cover.
03:39	For adult it should be 9 inches x 7 inches.
03:44	For a child it should be 7 inches x 5 inches
03:50	Now we will cut the strips.
03:53	For adult size face cover, cut 4 strips for tying and piping.
03:59	Two pieces each of 1.5 inches x 5 inches.
04:05	Also two pieces of 1.5 inches x 40 inches.
04:11	Attach a 1.5 inches x 5 inches strip on one end to use as piping to the fabric.
04:19	Create 3 pleats facing downward of about 1.5 inches each by folding the cloth.
04:28	Turn the pleated cloth to the other side and repeat the steps for pleating.
04:34	Now, the height of the cloth will be reduced from 9 inches to 5 inches.
04:42	Secure the pleats with piping on both sides.
04:46	Take extra care to keep all pleats facing downward.
04:51	Next, attach the long 40 inch strip to the top and bottom of the face cover.
04:59	Once again fold both these strips three times and stitch.
05:05	Your face cover is now ready to use.
05:09	While wearing it there should be no gaps between the face cover and your face.
05:15	The side facing you should show pleats facing downwards.
05:21	Never reverse the face cover for reuse
05:24	and wash it thoroughly after every use.
05:28	You should not touch your face or eyes.
05:31	Wash your hands thoroughly when you reach home.
05:35	Let us now see how to make a face cover without a sewing machine.
	You will need:
05:41	100% cotton material or a men's cotton handkerchief
05:47	and 2 rubber bands.
05:50	I will now explain the procedure to make the protective face cover.
05:55	Fold the handkerchief from one side to little above the middle of the cloth.
06:01	Now fold over the other edge to go above the first fold.
06:07	Fold this again evenly from the middle.
06:11	Take a rubber band and tie it on the left side of the cloth.
06:15	Now tie the other side with another rubber band.
06:20	Ensure that the area in the middle of the two rubber bands is big enough.
06:25	This will help you to cover your mouth and nose.
06:30	Take one edge of the cloth on the side of the rubber band and fold over it.
06:36	Do this for both sides.
06:38	Now take one fold and insert it into the other fold.
06:43	Your face cover is now ready to be used.
06:47	To wear this face cover just wrap each rubber band around your ears.
06:53	As mentioned earlier, ensure that the face cover fits around your mouth and nose.

107:00 There should be no gap in between them. 107:04 Follow safety precautions before wearing a protective homemade face cover. 107:14 As soon as the face cover becomes damp or humid, switch to another face cover. 107:14 As soon as the face cover becomes damp or humid, switch to another face cover. 107:27 After every single use of the face cover, wash it for next use. 107:28 While removing, do not touch the front or any other surface of the face cover. 107:32 While removing, do not touch the front or any other surface of the face cover. 107:33 Remove it only with strings behind or the rubber bands. 107:43 For string face cover, always untie the string below and then the string above. 107:51 After removing, immediately clean your hands with soap and water for 40 seconds. 107:55 You can also use 65% alcohol based hand sanitizer. 108:04 I will now tell you how to sanitize the face cover properly. 108:09 Please follow the method compulsorily. 108:12 Thoroughly wash the face cover with soap and warm water. 108:17 109:14 in hot sun for at least 5 hours. 108:17 109:14 in hot sun for at least 5 hours. 108:17 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:15 109:		
07:10 Wash your hands properly before wearing the face cover. 07:21 As soon as the face cover becomes damp or humid, switch to another face cover. 07:22 After every single use of the face cover, wash it for next use. 07:23 After every single use of the face cover, wash it for next use. 07:24 Every member in a family should have a separate face cover. 07:32 While removing, do not touch the front or any other surface of the face cover. 07:38 Remove it only with strings behind or the rubber bands. 07:43 For string face cover, always untie the string below and then the string above. 07:51 After removing, immediately clean your hands with soap and water for 40 seconds. 07:55 You can also use 65% alcohol based hand sanitizer. 08:04 I will now tell you how to sanitize the face cover properly. 08:10 Please follow the method compulsorily. 08:11 Dry it in hot sun for at least 5 hours. 08:21 Alternatively, you can use a pressure cooker to sanitize. 08:22 Put the face cover in water in a pressure cooker. 08:23 Add salt and boil it for at least 10 minutes. 08:33 Then, take it out and let it dry in a clean place. 08:34 You can also boil the face cover in hot water for 15 minutes. 08:44 If you do not have access to a pressure cooker or boilling water, use a soap. 08:59 You may use an iron box to apply the heat. 09:04 It is recommended that you make at least two face covers. 09:09 You can wear one, while the other is washed and dried. 09:13 Now, let us learn how to store the clean face covers. 17ake any plastic bag, 18 Let it dry properly on both the sides. 09:27 Keep the extra face cover in this clean bag and seal it well. 09:28 You can now use your face covers one by one for daily use. 17bings us to the end of this tutorial. 09:49 We learnt the need to wear a protective face cover due to Coronavirus. 09:51 We also learnt about the important warnings. 18elath workers should not use thememade face cover. 19:59 People in contact with COVID-19 patients also should not use it. 19:50 COVID-19 patients also should not use these fac	07:00	There should be no gap in between them.
07:14 As soon as the face cover becomes damp or humid, switch to another face cover. 07:27 Inter every single use of the face cover, wash it for next use. 07:27 Every member in a family should have a separate face cover. 07:32 While removing, do not touch the front or any other surface of the face cover. 07:33 Remove it only with strings behind or the rubber bands. 07:43 For string face cover, always untie the string below and then the string above. 07:51 After removing, immediately clean your hands with soap and water for 40 seconds. 07:58 You can also use 65% alcohol based hand sanitizer. 18:04 I will now tell you how to sanitize the face cover properly. 08:04 I will now tell you how to sanitize the face cover properly. 08:07 Please follow the method compulsorily. 08:12 Thoroughly wash the face cover with soap and warm water. 08:12 Thoroughly wash the face cover with soap and warm water. 08:12 Dry it in hot sun for at least 5 hours. 08:12 Put the face cover in water in a pressure cooker. 08:29 Add salt and boil it for at least 10 minutes. 08:33 Then, take it out and let it dry in a clean place. 08:33 You can laso boil the face cover in hot water f	07:04	Follow safety precautions before wearing a protective homemade face cover.
07:21 After every single use of the face cover, wash it for next use. 07:22 Every member in a family should have a separate face cover. 07:32 While removing, do not touch the front or any other surface of the face cover. 07:38 Remove it only with strings behind or the rubber bands. 07:43 For string face cover, always untie the string below and then the string above. 07:51 After removing, immediately clean your hands with soap and water for 40 seconds. 07:52 You can also use 65% alcohol based hand sanitizer. 08:09 I will now tell you how to sanitize the face cover properly. 08:09 Please follow the method compulsorily. 08:12 Thoroughly wash the face cover with soap and warm water. 08:17 Dry it in hot sun for at least 5 hours. 08:21 Alternatively, you can use a pressure cooker to sanitize. 08:22 Add salt and boil it for at least 10 minutes. 08:23 Then, take it out and let it dry in a clean place. 08:33 Then, take it out and let it dry in a clean place. 08:34 If you do not have access to a pressure cooker or boiling water, use a soap. 08:54 Wash and clean with soap 08:55 You may use an iron box to apply the heat. 09:04 It is recommended that you make at least two face covers. 09:09 You can ware one, while the other is washed and dried. 09:13 Now, let us learn how to store the clean face covers. 10:23 Let it dry properly on both the sides. 09:24 Keep the extra face cover in this clean bag and seal it well. 09:25 You can now use your face covers one by one for daily use. 09:26 We learnt the need to wear a protective face cover due to Coronavirus. 09:45 We learnt the need to wear a protective face cover. 09:59 Pople in contact with COVID-19 patients also should not use it. 10:00 COVID-19 patients also should not use these face covers. 10:10 They all must wear the specified protective gear, mandatorily.	07:10	Wash your hands properly before wearing the face cover.
07:27 Every member in a family should have a separate face cover. 07:38 While removing, do not touch the front or any other surface of the face cover. 07:38 Remove it only with strings behind or the rubber bands. 07:43 For string face cover, always untie the string below and then the string above. 07:51 After removing, immediately clean your hands with soap and water for 40 seconds. 07:58 You can also use 65% alcohol based hand sanitizer. 08:04 I will now tell you how to sanitize the face cover properly. 08:09 Please follow the method compulsorily. 08:12 Thoroughly wash the face cover with soap and warm water. 08:17 Dry it in hot sun for at least 5 hours. 08:18 The pit in hot sun for at least 5 hours. 08:21 Alternatively, you can use a pressure cooker to sanitize. 08:25 Put the face cover in water in a pressure cooker. 08:26 Add salt and boil it for at least 10 minutes. 08:33 Then, take it out and let it dry in a clean place. 08:34 If you do not have access to a pressure cooker or boiling water, use a soap. 08:44 If you do not have access to a pressure cooker or boiling water, use a soap. 08:54 and apply heat on the face cover for 5 minutes. 08:59 You may use an iron box to apply the heat. 09:09 You can wear one, while the other is washed and dried. 09:09 You can wear one, while the other is washed and dried. 09:13 Now, let us learn how to store the clean face covers. 17ake any plastic bag, 09:18 clean it thoroughly with soap and water. 09:22 Keep the extra face cover in this clean bag and seal it well. 09:32 You can now use your face covers one by one for daily use. 09:33 This brings us to the end of this tutorial. 09:41 Let us summarize what we learnt in this tutorial. 09:45 We learnt the need to wear a protective face cover due to Coronavirus. 09:54 We learnt the need to wear a protective face cover. 09:59 People in contact with COVID-19 patients too should not use it. 10:05 COVID-19 patients also should not use these face covers.	07:14	As soon as the face cover becomes damp or humid, switch to another face cover.
